C
Proposed Land Use Change: SI to LDR
Reason for Proposed Amendment: To correct a mapping error in the adopted Comprehensive Plan. This vacant parcel is not a part of the Holy Name property and the designation of Special Institutional was an error.

Proposed Land Use Change: E to LDR
Reason for Proposed Amendment: To correct a mapping error in the adopted Comprehensive Plan.
These existing residential properties are south of the Cottage Grove Road business district, and the designation of E was an error.
Comments: Lands adjacent to the west and south are designated LDR. The Royster-Clark SAP recommends changing the adjacent lands to the north and east from E to NMU and SI, respectively.

Map Amendment - Correction
Locator Map E

As Adopted:

Proposed Correction:
Locator Map E:

E

Proposed Land Use Change:  MDR to LDR
Reason for Proposed Amendment: To more accurately reflect the predominantly low-density character of this portion of an established neighborhood.
Comments: Except for a few parcels in the westernmost half block, existing net density in this area ranges from about 3 to about 14 units per acre. No current plan recommends increased densities in the residential portions of this neighborhood.
Locator Map F:

F-1
Proposed Land Use Change: E to P
Reason for Proposed Amendment: To reflect the revised final alignment of the planned Milwaukee Street extension, which will cross beneath the Interstate to provide a connection to the Northeast Neighborhoods.
Comments: Wetlands exist immediately east of the planned roadway, and no development east of the road is intended.

F-2
Proposed Land Use Change: LDR to MDR
Reason for Proposed Amendment: To more accurately reflect the approved and planned densities and housing types in this portion of the neighborhood.
Comments: None

F-3
Proposed Land Use Change: LDR to P
Reason for Proposed Amendment: To be consistent with the adopted Sprecher Neighborhood Development Plan, which recommends open space uses.
Comments: The Sprecher NDP recognizes two existing residential uses in this area by mapping a small Low Density Residential land use circle on each site. This construct indicates that expansion of these uses and a larger development area is not intended. These isolated existing uses are generally not shown on the Comprehensive Plan maps.

Cottage Grove Neighborhood Development Plan

O

Proposed Land Use Change: LDR and P to MDR, LDR, P and SI
Reason for Proposed Amendment: To reflect the more-detailed land use recommendations in the Buckeye Amendment to the Cottage Grove Neighborhood Development Plan [amendment adopted 11-7-06]
Comments: This amendment area has a near-term and long-term component, as well as alternatives that depend on the extent of the open space corridor that can be implemented.
Also revise Map Note 21 to read: “Restoration and preservation as open space is the long-term recommendation for the limited area of high ground east of Underdahl Road currently occupied by small industrial-commercial uses. If this is not feasible, the alternative of limited residential development would be more visually and functionally compatible with the surrounding open space uses than would redevelopment with new commercial or industrial uses.”

**Midtown Neighborhood Development Plan**

**T-1**
- **Proposed Land Use Change:** LDR and P to MDR, LDR and P
- **Reason for Proposed Amendment:** To replace the general land use recommendations for the western portion of the planning area with more detailed recommendations from the amendment to the Mid-Town Neighborhood Development Plan [adopted 8-3-10]
- **Comments:** None

**T-2**
- **Proposed Land Use Change:** P and LDR to SI and LDR
- **Reason for Proposed Amendment:** To reflect the platted street pattern and the actual Olson Elementary School site, which also encompasses an area of recreational open space.
- **Comments:** As noted in the footnote to this page, the exact alignment of streets and pattern of land uses and densities recommended in the Neighborhood Development Plans for peripheral areas are almost always modified to some degree as individual and subdivisions and development projects are approved over an extended period of time.

While these types of relatively minor adjustments are considered consistent with both the Neighborhood Development Plan and the Comprehensive Plan and do not require a Comp Plan amendment, a corresponding update to the Comprehensive Plan is warranted in some cases to maintain map clarity.

**T-3**
- **Proposed Land Use Change:** LDR to MDR and MDR to LDR
- **Reason for Proposed Amendment:** To reflect modifications to the pattern of residential densities in this area established through development approvals.
- **Comments:** None
